10 Educational environments: Resource management portal for laboratories using real devices on the Internet

Stefan Zimmerli, Marc-Alain Steinemann, Torsten Braun

July 2003 **ACM SIGCOMM Computer Communication Review**, Volume 33 Issue 3

**Publisher:** ACM Press

Full text available:  [pdf\(343.16 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Internet-based distance learning is slowly gaining new territories and substituting current teaching methodologies. However, distance learning not only consists of transferring documents to web pages, but also of developing new concepts, methods, and implementation architectures. This article presents concepts and implementation issues for an example remote hands-on networking laboratory. The described course gives access to real network hardware via the Internet. In particular, authentication, ...

11 Building computational grids with apple's Xgrid middleware

Baden Hughes

January 2006 **Proceedings of the 2006 Australasian workshops on Grid computing and e-research - Volume 54 ACSW Frontiers '06**

**Publisher:** Australian Computer Society, Inc.

Full text available:  pdf(246.93 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Apple's release of the Xgrid framework for distributed computing introduces a new technology solution for loosely coupled distributed computation. In this paper systematically describe, compare and evaluate the Apple native Xgrid solution and a range of third party components which can be substituted for the native versions. This description and evaluation is grounded in practical experience of deploying a small scale, internationally distributed, heterogenous computational infrastructure based ...

Lighter data retrieval and an alternative to NIS.

13 Teaching operating systems administration with user mode linux

Renzo Davoli

June 2004 **ACM SIGCSE Bulletin , Proceedings of the 9th annual SIGCSE conference on Innovation and technology in computer science education ITiCSE '04**, Volume 36 Issue 3

**Publisher:** ACM Press

Full text available:  pdf(99.64 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

User Mode Linux is a virtual machine running on a GNU-Linux operating system. It is the right choice for teaching operating systems' administration, as it does not need any dedicated hardware. It runs at user level (no need for root, i.e. administrator, access or possible security threats) and it does not have the performance problems of an emulator. This paper describes how to set up a laboratory for teaching operating systems' administration.

**Keywords:** administration, laboratory, operating systems, security, teaching, virtual machine

14 Putting OSX in an open access lab: (or "The Joy of X")

David L. R. Houston

September 2003 **Proceedings of the 31st annual ACM SIGUCCS conference on User services SIGUCCS '03**

**Publisher:** ACM Press

Full text available:  pdf(211.45 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

This paper discusses the challenges of putting Apple Macintosh OSX into open access and computer lab environments.

**Keywords:** Macintosh, OSX, configuration, imaging, integration, lab, labs, maintenance, open access, security, software distribution, workstation

Patrick C. Moore, Wilbur R. Johnson, Richard J. Detry

November 2001 **Proceedings of the 2001 ACM/IEEE conference on Supercomputing (CDROM) Supercomputing '01****Publisher:** ACM PressFull text available:  [pdf\(143.26 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Porting a complex secure application from one security infrastructure to another is often difficult or impractical. Grid security associated with the Globus toolkit is supported by a Grid Security Infrastructure (GSI) based on a Public Key Infrastructure where users authenticate to the grid using X509 certificates. Kerberos security is based on a trusted third party, secret key infrastructure where users authenticate using encrypted tickets. However, both GSI and Kerberos provide a Generic Secur ...

Authorization systems today are increasingly complex. They span domains of administration, rely on many different authentication sources, and manage permissions that can be as complex as the system itself. Worse still, while there are many standards that define authentication mechanisms, the standards that address authorization are less

well defined and tend to work only within homogeneous systems. This paper presents XACML, a standard access control language, as one component of a distributed a ...

20 Scalable directory services using proactivity

Fabián E. Bustamante, Patrick Widener, Karsten Schwan

November 2002 **Proceedings of the 2002 ACM/IEEE conference on Supercomputing Supercomputing '02**

**Publisher:** IEEE Computer Society Press

Full text available:  pdf(154.65 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Common to computational grids and pervasive computing is the need for an expressive, efficient, and scalable directory service that provides information about objects in the environment. We argue that a directory interface that 'pushes' information to clients about changes to objects can significantly improve scalability. This paper describes the design, implementation, and evaluation of the Proactive Directory Service (PDS). PDS' interface supports a customizable 'proactive' mode through which ...

This paper discusses the challenges of putting Apple Macintosh OSX into open access and computer lab environments.

**Keywords:** Macintosh, OSX, configuration, imaging, integration, lab, labs, maintenance, open access, security, software distribution, workstation

### 4 [Scalable directory services using proactivity](#)

Fabián E. Bustamante, Patrick Widener, Karsten Schwan

November 2002 **Proceedings of the 2002 ACM/IEEE conference on Supercomputing Supercomputing '02****Publisher:** IEEE Computer Society PressFull text available: [pdf\(154.65 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Common to computational grids and pervasive computing is the need for an expressive, efficient, and scalable directory service that provides information about objects in the environment. We argue that a directory interface that 'pushes' information to clients about changes to objects can significantly improve scalability. This paper describes the design, implementation, and evaluation of the Proactive Directory Service (PDS). PDS' interface supports a customizable 'proactive' mode through which ...

##### 5 Course design & learning enhancement: A unique experiential model for teaching network administration

Sylvia Perez-Hardy

October 2003 **Proceedings of the 4th conference on Information technology curriculum CITC4 '03**

**Publisher:** ACM Press

Full text available: pdf(156.22 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We have moved from teaching networking in a purely theoretical manner using lecture and paper exercises to a lab-based approach. This serves to illustrate and reinforce the theory imparted to the students in lecture and through readings. But not all lab teaching models are created equal. In the introductory course the model used is one of very specific guidance in the performance of the lab experiments. The students then observe the results and collect the data, which they use to answer very spe ...

**Keywords:** administration laboratory, exploratory, network

##### 6 NAS: the NAIST user authorization management system for network accesses in consideration of system administration volunteers

Motohiro Ichikawa, Yutaka Nakamura, Eiji Kawai, Kazutoshi Fujikawa, Hideki Sunahara

November 2005 **Proceedings of the 33rd annual ACM SIGUCCS conference on User services SIGUCCS '05**

**Publisher:** ACM Press

Full text available: pdf(844.79 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Nara Institute of Science and Technology (NAIST) user Authorization management System for network accesses (NAS) was designed and developed as a campus-network management system for administrators who are not information and communications technology (ICT) experts. Student residents have successfully operated the system in the dormitory network since November 2002, in the staff accommodation network by residents since June 2003, and as the component of the Guesthouse Network Management System ...

11 Exploring Linux as an operating system in the CS curriculum

E. Grant Eastman

April 2006 **Journal of Computing Sciences in Colleges**, Volume 21 Issue 4

**Publisher:** Consortium for Computing Sciences in Colleges

Full text available:  [pdf\(186.63 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Linux operating system as a variant of UNIX is having a significant impact on the computing community including major corporations and other organizations. This paper describes the development and implementation of a course on the UNIX operating system using Linux as the vehicle. The course includes discussion of the UNIX development, installation and configuration of Linux on personal computers, and experience with scripting including Perl. Student experiences with the course and their resp ...

13 A web-based tool for managing the submission of student work

David Wolff

December 2004 **Journal of Computing Sciences in Colleges**, Volume 20 Issue 2

**Publisher:** Consortium for Computing Sciences in Colleges

Full text available:  [pdf\(333.31 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

The electronic submission of student work is an issue that every computer science department must deal with in one way or another. Many departments use the least common denominator: email. Despite its convenience, email can be difficult to organize and large files can quickly fill up an instructor's inbox. This paper presents a web-based system that provides for the on-line submission and retrieval of student work. Students can upload their work from anywhere in the world with access to a web br ...

15 Constraints: On context in authorization policy

Patrick McDaniel

June 2003 **Proceedings of the eighth ACM symposium on Access control models and technologies SACMAT '03**

**Publisher:** ACM Press

Full text available:  [pdf\(316.39 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Authorization policy infrastructures are evolving with the complex environments that they support. However, the requirements and technologies supporting context are not yet well understood. Often implemented as condition functions or predefined attributes, context is used to more precisely control when and how policy is enforced. This paper considers context requirements and services in authorization policy. The properties and security requirements of context evaluation are classified. A key obs ...

Full text available:  [html\(351.00 bytes\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Federate your indexes to enhance searches.

18 Extensible job managers for grid computing

Paul D. Coddington, Lici Lu, Darren Webb, Andrew L. Wendelborn

February 2003 **Proceedings of the 26th Australasian computer science conference - Volume 16 ACSC '03**

**Publisher:** Australian Computer Society, Inc.

Full text available:  [pdf\(293.64 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Grid computing is becoming an important framework for enabling applications to utilize widely distributed collections of computational and data resources, however current grid software is still immature and rather difficult to use. The Globus Grid Toolkit is a set of low-level tools, protocols and services that has become a defacto standard for basic grid computing infrastructure. The Globus Resource Allocation and Management (GRAM)

service provides for the management and remote execution of job ...

Bring your most complicated NFS challenges under control with a versatile utility.

20 Monitoring hacker activity with a Honeynet

Kevin Curran, Colman Morrissey, Colm Fagan, Colm Murphy, Brian O'Donnell, Gerry Fitzpatrick, Stephen Condit

March 2005 **International Journal of Network Management**, Volume 15 Issue 2

**Publisher:** John Wiley & Sons, Inc.

Full text available:  [pdf\(434.12 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Honeynet Project was founded by 30 US based security professionals with the intention of researching the techniques, tools, tactics and motives of hackers and the 'blackhat' community in general. A Honeynet Project is an all volunteer, non-profit organization committed to sharing and learning the motives, tools, and tactics of the hacking community. It is comprised of a number of information security professionals dedicated to honeynet research and information security. This paper outlines t ...

Displaying records #1 through 10 out of 11

Result # 1 Relevance:

**X.500 Implementations Catalog-96 (RFC2116)**

1997-04-01

IPCOM000002669D

En

This document is a revision to [RFC 1632]: A Revised Catalog of Available X.500 Implemer is based on the results of data collection via a WWW home page that enabled implemer new or updated descriptions of currently available implementations of X.500, ...

Result # 2 Relevance:

**Bulkload Tool for LDAP/DB2**

1999-04-01

IPCOM000123755D

En

There are two ways to create a LDAP database from scratch: First, a user can create th line using LDAP server. With this method, users simply start up LDAP server (slapd) an using the LDAP client tool ldapadd. This method is fine for relatively ...

Result # 3 Relevance:

**An Approach for Using LDAP as a Network Information Service (RFC2:**

1998-03-01

IPCOM000002872D

En

This document describes an experimental mechanism for mapping entities related to TC UNIX system into X.500 [X500] entries so that they may be resolved with the Lightwei Access Protocol [RFC2251]. A set of attribute types and object classes are ...

Result # 4 Relevance:

**Using DNS to Securely Publish Secure Shell (SSH) Key Fingerprints (R**

2006-01-01

IPCOM000132700D

En

This document describes a method of verifying Secure Shell (SSH) host keys using Don System Security (DNSSEC). The document defines a new DNS resource record that con standard SSH key fingerprint.

Result # 5 Relevance:

**Dynamic Delegation Discovery System (DDDS) Part Two: The Algorith (RFC3402)**

2002-10-01

IPCOM000010077D

En

This document describes the Dynamic Delegation Discovery System (DDDS) algorithm dynamically retrieved string transformation rules to an application-unique string. Well-f transformation rules will reflect the delegation of management of information ...

Result # 6 Relevance:

**Algorithm to do Agent-Less Account Management via Provisioning, Ev Notification in Remote Resources**

2005-09-29

IPCOM000129160D

En

Enterprises require identity management for managing users on various resources with which often are used for enterprise server management. These systems sometimes pro repositories that are accessible to various users within the corporate network ...

Result # 7 Relevance:

**A Method to install Unix Operating System on remote boxes**

2003-03-06

IPCOM000011575D

En

OS Load Interface Application: Disclosed is a user interface capable to perform several Unix installations without requiring specific Unix installation skills while respecting security constraints.

---

Result # 8      Relevance: 

**The Internet and the Millennium Problem (Year 2000) (RFC2626)**

1999-06-01

IPCOM000003213D

En

The Year 2000 Working Group (WG) has conducted an investigation into the millennium regards Internet related protocols. This investigation only targeted the protocols as documented in the Request For Comments Series (RFCs). This investigation discovered little ...

---

Result # 9      Relevance: 

**Assigned Numbers (RFC1700)**

1994-10-01

IPCOM000002539D

En

The files in this directory document the currently assigned values for several series of numbers in network protocol implementations.

## X.500 Implementations Catalog-96 (RFC2116)

1997-04-01 UTC

United States

English (United States)

This disclosure was originally published as an RFC by ISOC on 1997-04-01

Loaded into the IP.com Prior Art Database on (2000-09-13)

This document is a revision to [RFC 1632]: A Revised Catalog of Available X.5 Implementations and is based on the results of data collection via a WWW home page enabled implementors to submit new or updated descriptions of currently available implementations of X.500, including commercial products and openly available products. [RFC 1632] is a revision of [RFC 1292]. We contacted each contributor to [RFC 1632] and published the URL of the WWW home page survey template in several places to encourage the submission of new product descriptions.
